

Nguyen Trung Hau

Frontend Developer Intern

Ho Chi Minh City, Viet Nam | nguyentrungchau7746@gmail.com | 0384 358 560
github.com/tVhowww

Summary

Final-year Software Engineering student specializing in Fullstack Development (Frontend-focused). Hands-on experience in building responsive user interfaces using ReactJS/Next.js/React Native with TailwindCSS, integrating REST APIs via Axios, and managing state (Zustand, React Query). Strong backend foundation (Spring Boot, Node.js, databases) enables efficient team collaboration and end-to-end feature delivery.

Education

Industrial University of Ho Chi Minh City, B.Eng. in Software Engineering – Ho Chi Minh City Sept 2022 – present
• GPA: 3.36/4.00; Academic Excellence Scholarship: 2022, 2024

Languages

English: TOEIC L&R 740/990

Skills

Frontend: ReactJS, Next.js, React Native, TypeScript, JavaScript, TailwindCSS, HTML5/CSS3, Zustand, React Query

Backend: Java (Spring Boot), Node.js, REST APIs, JWT, JPA/Hibernate, OpenFeign

Data & Messaging: PostgreSQL, MariaDB, MongoDB, Redis, Kafka, RabbitMQ, Socket.io

Tools: Git, GitHub, Docker, Cloudinary, Postman, Swagger, Jira, Agile/Scrum

Projects

Alo Chat [Source code] Jan 2026 – June 2026
Real-time chat and admin platform — ReactJS, React Native, Spring Boot, Socket.io, Zustand, MongoDB, MariaDB. Role: Fullstack Developer (Team size 5).

- Contributed to gateway routing, Eureka discovery, RabbitMQ events, Redis caching, Socket.io real-time communication, and API response wrapping.
- Built admin/moderation features for user management, ban/unban, group moderation, report review, global broadcast.
- Implemented real-time chat features (typing indicators, user presence, auto-reconnect) using Zustand and socket.io-client on Web and Mobile.
- Crafted interactive statistics widgets and user carousel components on both Web (React) and Mobile (React Native) screens.

FinTrack Pro [Source code] [Link Demo] Dec 2025 – May 2026
Java microservices finance platform — Next.js, React Query, Recharts, TailwindCSS, Spring Boot, Kafka, PostgreSQL, Redis. Role: Fullstack Developer (Personal project).

- Developed the frontend dashboard using Next.js (App Router), TailwindCSS, Recharts, and React Query for state synchronization and client-side caching.
- Architected a 6-service Spring Cloud system (Identity, Wallet, Transaction, Notification, Gateway, Eureka), securing API routes with HttpOnly JWT cookies, token rotation, and Google OAuth2.
- Implemented Kafka Saga, Transactional Outbox, and Inbox patterns with Redis distributed locks, guaranteeing zero data loss and absolute transactional consistency during cross-wallet transfers.
- Integrated Google Gemini (Spring AI) to automate receipt parsing and power a persistent financial advisor chatbot.

WatchStore Website [Source code] Sept 2025 – Dec 2025
Online watch e-commerce platform — ReactJS, React Router DOM, TailwindCSS, Cloudinary, Spring Boot, MariaDB. Role: Fullstack Developer (Team size 6).

- Developed Spring Boot REST APIs across 18+ key controllers (including Products, Categories, Suppliers, and Inventory).
- Implemented product filtering/pagination, integrated VNPay payment gateway and client-side Cloudinary media upload.
- Engineered ReactJS customer flows (cart, checkout, search) and modular admin control panels for managing inventory, categories, and banners.
- Created reusable components, modal dialogs, and breadcrumbs navigation using React Router DOM.
